- The impurity threshold used to verify compliance is based on percent weight of regulated material per homogeneous/individual material. Homogeneous material means a unit that cannot be mechanically disjoined in single materials. The term "homogeneous" is understood as "of uniform composition throughout". Examples of "homogeneous materials" are individual types of: plastics, ceramics, glass, metals, alloys, paper, board, resins and coatings.
- I hereby certify that the part number and revision level **Sheen Point Factory** provided by ADDA Corporation conforms to the European RoHS Directive as described above.
